Art Unit: 1723

Applicant's election of group I in Paper No. 9 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the following must be shown or the feature(s) canceled from the claim(s):

The limitation of the protrusions being positioned at the recited distance h₁ lacks antecedent basis in the specification;

The limitation of the supporting elements having an I-shape as recited in claim 12.

No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The concept of the protrusions being positioned at the recited distance h₁ lacks antecedent basis in the specification.

Application/Control Number: 09/776,320

Art Unit: 1723

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 499154.

With respect to claim 1, '154 discloses a plurality of screen rods 3 each having side walls 7, 8 (see FIG. 2), at least one of the side walls defining at least one protrusion 36, at least one rod bearing support element 1' having a shape that is complementary to the protrusion of the rod, wherein each protrusion of the rod is received within a recess of the supporting element.

Regarding claim 8, '154 discloses the rods as having an embedded portion pressed together with the supporting element (e.g., due to the clamping force exerted upon the rods by the supporting elements).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-7, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 499,154.

Application/Control Number: 09/776,320

Art Unit: 1723

Concerning claim 2, 6, and 12, '154 fails to specify the limitation of the circular or elliptic shape or the protrusions as recited in claim 2, the limitation of the supporting elements as having a T-shape as recited in claim 6, or the limitation of the supporting elements as having an I-shape as recited in claim 12, however, such changes in shape are considered obvious absent any persuasive evidence that such configurations are structurally significant (see In re Dailey, 357 F.2d 669, 149 USPQ 47 (CCPA 1966)).

With respect to claim 3, '154 discloses each of the rods as having an embedded end with at least one of the rods having a plurality of protrusions 36, 36'. '154 fails to specify the protrusions as being positioned at a distance .1mm<h₁<6mm, however, such relative dimensions are not considered to be a patentable distinction since the instant invention would not appear to function any differently than the '154 device.

Regarding claims 4 and 5, '154 fails to specify the limitation of the rods as having three or more protrusions received within recesses in one side wall of the supporting elements as recited in claim 4, or the limitation of the first sidewall as having a different number of protrusions that the second sidewall as recited in claim 5, however, the mere duplication of parts / number of protrusions is not considered to be patently significant unless a new and unexpected result is produced (see In re Harza, 274 F2.d 669, 124 USPQ 378 (CCPA 1960)).

With respect to claim 7, '154 discloses each of the rods as having a total height H and an embedded portion protruding into the supporting element having a height h but fails to specify the ratio of h to H as being greater than 0.5, however, such relative

Application/Control Number: 09/776,320

Art Unit: 1723

dimensions are not considered to be a patentable distinction since the instant invention would not appear to function any differently than the '154 device.

With respect to claim 11, '154 discloses the protrusions 36 as having a radius r (e.g., at opposite sides of the protrusion) but fails to specify .1mm<r<2mm, however, such relative dimensions are not considered to be a patentable distinction since the instant invention would not appear to function any differently than the '154 device.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew O Savage whose telephone number is 703-308-3854. The examiner can normally be reached on Monday-Friday, 7:00am-3:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda W. Walker can be reached on 703-308-0457. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3602 for regular communications and 703-305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
